

2MWh Solar Energy Storage Unit in Nigeria

Overview

With a 2MWh capacity and 400V plug-and-play functionality, this solution provides stable power for industrial, commercial, remote community and large-scale project applications. It effectively addresses the issues of grid instability and power shortages that Nigeria faces. The project, configured with 334 kW of solar PV and 1 MW/2 MWh of energy storage, was successfully deployed in a community in Plateau State by the Federal Government through the World Bank Africa-funded Nigeria Electrification Project (PBG). This solar and storage hybrid mini-grid provides reliable. A Solar PV Solution is a renewable energy system that converts sunlight into electricity using photovoltaic panels. It can be deployed for residential, commercial, industrial, or utility-scale applications and can operate grid-tied, off-grid, or as part of a hybrid or microgrid system. 3 MWp and energy storage capacity of 2 MWh.
