

# 50 billion wind solar and storage project

## Overview

The project combines wind, solar, and a 300-megawatt iron-air battery system built by Form Energy. The goal is to power Google's core services, including Search, YouTube, Maps, and Workspace, while keeping costs stable for existing customers. 04, 2024 (GLOBE NEWSWIRE) -- Apollo (NYSE: APO) today announced that funds managed by Apollo affiliates (the "Apollo Funds") have agreed to acquire a 50% stake in a Texas solar and battery energy storage system ("BESS") portfolio from TotalEnergies. The portfolio includes. Abu Dhabi, United Arab Emirates; San Diego, United States: April 12, 2023: Masdar, one of the world's fastest-growing clean energy companies, has further expanded its presence in the United States' renewables market after closing the acquisition of a 50 percent stake in a combined solar and battery. Xcel Energy will supply electricity to a new Google data centre in Pine Island, Minnesota, under a large clean energy agreement that also includes the world's biggest battery system by energy capacity. The farm-downs include two solar farms in Texas. Google will build its first data center in Minnesota in a small town called Pine Island.
