

## 5kW inverter life

### Overview

Solar inverters last 10-15 years on average, with microinverters and power optimizers often lasting 20+ years. Heat, quality, installation, and maintenance heavily influence lifespan. A 5KW inverter is powerful enough to run several appliances at once. 2V (LiFePO4 lithium batteries), meaning you need at least four 12V batteries to power it or one 48V (51.
