

# Analysis of price trend of soft film photovoltaic panels

## Overview

Summary: This analysis explores the evolving price trends of soft film photovoltaic panels, focusing on key market drivers like material innovation and renewable energy demand. Identifying price trends and giving long-term price forecasts have been an integral part of Green Energy Research's market intelligence services. ) Polysilicon Supply side: The polysilicon sector is currently facing significant inventory pressure. This work informs research and development by identifying drivers of cost and competitiveness for solar technologies. It is the first solar materials price report to use an assessment methodology that follows IOSCO requirements for fair and transparent. In Q2 2024, the average photovoltaic panel factory price list shows: "Global oversupply of polysilicon has driven down prices by 34% since 2023," reports BloombergNEF. This creates a buyer's market - if you know where to look. 4 Billion in 2026 to hit USD 20.
