

Analysis of the power supply function of communication base station

Overview

In this article, a mathematical model of the power supply system for a mobile communication base station is developed. Power outages can lead to a decrease in communication quality or even complete service interruptions, negatively affecting users and threatening system reliability. Practice shows that the existing energy supply sources - the power grid, diesel generators and batteries - do not allow for effective operation in. Abstract: With the rapid development of mobile communication service, the construction of mobile communication base station presents the trend of rapid development, the distribution of base station is more and more wide, more and more new requirements are put forward for the maintenance management. In today's digital era, communication base stations are the key infrastructure for information transmission, and its stable operation is particularly important.

Article Content

Communication power supply design based on PFC and LLC

Abstract: In order to meet the high power and high stability requirements of communication base stations for power supply, this paper designs a dedicated 500W switch power supply for communication base ...

Distribution network restoration supply method considers 5G base ...

In view of the impact of changes in communication volume on the emergency power supply output of base station energy storage in distribution network fault areas, this paper introduces ...

Algorithms for uninterrupted power supply to mobile ...

In this article, an algorithm for automatic control of energy sources was developed to improve the uninterrupted power supply of mobile communication base stations. Based on the proposed ...

Mathematical Modelling of the Power Supply System of a Mobile ...

In this article, a mathematical model of the power supply system for a mobile communication base station is developed. Based on the developed mathematical model, the mobile ...

Envelope Tracking Power Supply for Energy Saving of Mobile ...

The power consumption of the RF PA in wireless communication base stations are too large and the efficiency of RF PA is too low. In this paper, a new hybrid ET power supply with a multi ...

Telecom Base Station Power System Solution

In order to ensure the continuity and efficiency of communication services, the power system of telecommunications base stations needs to have high reliability, stability and high efficiency to meet ...

DC20161020.doc

According to the special environment and requirement of base station communication power supply, by using corresponding circuit control analysis and heat dissipation design, two...

Complete Guide to 5G Base Station Construction | Key Steps, Equipment ...

Explore how 5G base stations are built—from site planning and cabinet installation to power systems and cooling ...

Application of smart power usage on the ...

Using intelligent power management technology, it can realize intelligent power supply to communication equipment, providing appropriate ...

Analysis of the power supply function of communication base station

In order to meet the high power and high stability requirements of communication base stations for power supply, this paper designs a dedicated 500W switch power supply for communication base ...
