

Are photovoltaic solar panels safe on the roof

Overview

According to energy experts Andrew Blok and Andrew Giermak, "here's what you need to know": Rooftop solar systems are generally considered safe — both for the structure of your home and the people living in it — and can offer significant environmental benefits. Solar energy continues to experience record-breaking growth, but many homeowners still wonder whether installing solar panels on their roofs is safe. This guide explains major hazards—fire risk, structural load, weather-related damage, electrical issues, and emergency response. However, installing solar panels on roofs can come with its own challenges and potential problems. Concerns about leaks, voided warranties, or long-term structural damage are common. However, these elements (like cadmium and silver) are not present in every type of solar panel. Solar production across the.
