

Australian energy storage exports

Overview

IEEFA's Australian Gas and LNG Tracker is an interactive data set to visualise Australia's liquefied natural gas (LNG) infrastructure, demand and capacity outlook, and export flows. Adding energy storage enables us to shift energy in time from when it is produced to its later use – think about a natural gas storage tank or a torch battery. What is energy storage?

Energy storage secures and stabilises energy supply, and services and cross-links the electricity, gas, industrial. The Australian Energy Statistics is the authoritative and official source of energy statistics for Australia and forms the basis of Australia's international reporting obligations. It is updated annually and consists of historical energy consumption, production and trade statistics. Estimates are grouped according to commodity type, reserves and annual production. The publication provides: detailed statistical tables. 6% in 2023-24 to 23,693 petajoules (PJ). But now, the mission is 'firming' the complex integration of software, chemistry, and thermal physics required to make intermittent renewables behave like baseload power.

Article Content

Australia's solar & storage sectors drive record Q3 ...

Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation ...

Energy Account, Australia

The EAA is intended to show how energy products are supplied and used within the economy (i.e. how they are produced, imported, exported and ...

Australia Country Analysis Brief

Australia's 2024 LNG exports constituted almost 20% of global export volumes, allowing it to maintain its position as the second-largest exporter of LNG behind the United States.⁴⁸

Australian Gas and LNG Tracker | IEEFA

IEEFA's Australian Gas and LNG Tracker is an interactive data set to visualise Australia's liquefied natural gas (LNG) infrastructure, demand and capacity ...

Australian Energy Statistics

The Australian Energy Statistics is the authoritative and official source of energy statistics for Australia and forms the basis of Australia's international reporting ...

Australia ships LNG 25,000 kilometres to Canada amid Asian slump ...

Australia is shipping LNG much further than its main buyers in Asia as demand for the super-chilled fuel in the region falters. East Canada is set to receive its first Australian shipment of ...

Australia's Energy Commodity Resources 2024 Overview

Data published by the International Energy Agency (IEA), the World Nuclear Association and the Energy Institute are examined in this section to ...

Resources and energy quarterly: September 2025

The Resources and energy quarterly (REQ) contains the Office of the Chief Economist's forecasts for the value, volume and price of Australia's major ...

How Australia is leading the world in energy storage

The "Storage Gap" and the Australian advantage To move beyond 82% renewables, Australia needs a massive increase in storage capacity. We require a mix of "sprint" storage (lithium ...
