

Australian office building energy storage project

Overview

The project, the first of its kind in Australia, will repurpose a disused mine in Broken Hill, New South Wales to store compressed air. It will produce 200 MW of power and store. Downtown office towers cut energy costs by 40% with 500kW rooftop solar arrays, powering daytime operations and reducing grid dependence in Australia's sunny business hub. It will also open an. The Australia-Asia Power Link BESS is part of SunCable's proposed solar power and transmission project connecting the Northern Territory to Darwin and Singapore. The battery energy storage system project is currently the largest battery energy storage project in Australia under construction. "Operating" includes those projects currently working; "Construction" means those being built or waiting to be commissioned; "Announced" refers to those with a level of commitment - contracts. The utility-scale battery storage facility will add reliability to Victoria's energy supply while supporting the growth of renewable energy across the state. EnergyAustralia achieved financial close for the Wooreen Energy Storage System on 20th February 2025. Construction will now commence on the.
