

CIMC container energy storage

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilizing
- Max. PV Input Current 15A, Compatible with High Power Modules

Intelligent Simple O&M

- IP66 Protection Degree, support outdoor installation
- Smart I-V Curve Diagnosis Function, locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPDs prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 units Inverters Parallel
- AGC Function (Optional): when an anti-fault is detected the inverter immediately stops operation

Overview

Container Energy Storage System - TAICANG CIMC CONTAINER CO. It has battery cabinets, battery management system (BMS), container dynamic loop monitoring system, and can integrate energy. Anchored in the dual principles of “safety and efficiency”, this project seeks to establish a closed-loop multi-energy supply and consumption ecosystem while developing a safety alert mechanism integrating vehicles, piles, and grids, and a quantitative system for key indicators such as. CESS is an integrated energy storage system developed for the needs of the mobile energy storage market. Let's face it - the world's energy game is changing faster than a Tesla charging on super mode. As renewable energy adoption skyrockets, CIMC Energy Storage Technology Company has emerged as a key player in solving the puzzle of intermittent power supply. Imagine solar panels that work like night. On October 16, 2023, China International Marine Containers (Group) Co. (hereinafter referred to as "the Company" or "the Company", and together with its subsidiaries, the "Group") intends to cooperate with the Company's largest shareholder Shenzhen Capital Operation Group Co.
