

# Can boston do energy storage projects

## Overview

The new clean energy law that Gov. Maura Healey signed in 2024 allows energy storage system projects of at least 100 megawatt-hours to receive a comprehensive exemption from local zoning bylaws if the EFSB issues a certificate. Massachusetts is making a big push for batteries — not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. A project taking shape near Boston could help make the case for an alternative to expanding the grid: big. The Energy Storage Initiative (ESI) aims to make the Commonwealth a national leader in the emerging energy storage market. Energy storage is a significant strategic opportunity for Massachusetts. It can improve grid operations, reduce energy costs, provide backup power through storms, and benefit. Explore the largest battery storage projects in Massachusetts and see all the utility-scale battery projects in Massachusetts on a map. Michael is the CEO of Cleanview. The procurement is part of a broader effort to procure 5 GW of energy storage by 2030.

## Article Content

Mass. wants to build big battery farms to store energy

A \$1 billion-plus battery farm big enough to power 500,000 homes for four hours could start going up as soon as the end of next year in Everett, ...

Can a big battery help Boston save billions on the... | Canary Media

A project taking shape near Boston could help make the case for an alternative to expanding the grid: big, strategically placed batteries. In fact, energy storage has already helped ...

Massachusetts is ramping up energy storage. Here's where new ...

Massachusetts aims for 5,000 megawatts of battery storage by 2030, but residents voice safety and environmental concerns over the rapid expansion.

A battery storage facility is being proposed in a rural ...

According to Cleanview, a company that tracks clean energy developments, as of July 2025, there are 111 utility-scale battery storage ...

2024 Clean Energy Act Promotes Energy Storage ...

The new Section 83E directs Massachusetts utilities to enter into long-term contracts for approximately 5,000 MW of energy storage systems by ...

Energy Storage Initiative

Energy storage is a significant strategic opportunity for Massachusetts. It can improve grid operations, reduce energy costs, provide backup power through ...

RFP alert: Massachusetts takes steps toward 40 GWh ...

Massachusetts is initiating efforts toward its 2024 goal of procuring 5 GW of energy storage by 2030. A draft request for proposals (RFP) for 1.5 GW ...

Massachusetts Battery Storage Incentives: A Guide to ...

Massachusetts is accelerating toward 5,000 MW of energy storage by 2030 with a robust mix of incentives, grants, and market programs. This ...

Massachusetts Battery Storage Project Map & Project List

Interactive map of battery storage projects in Massachusetts. View project locations, the largest developments, and capacity data.

As Mass. pushes for big batteries on the grid, some communities push ...

More than 6,000 operating lithium-ion battery systems provide about 500 megawatts of energy storage capacity in the state today, according to the Massachusetts Department of Energy ...
