

Cote d ivoire renewable energy growth

Overview

In its energy vision for 2030, Côte d'Ivoire aims to increase its production capacity to 5,000 MW, with 42% coming from renewable sources, in line with commitments made under the Paris Agreement and the African Union's Agenda 2063. Renewable. Since the adoption of the Paris Agreement in December 2015, 189 countries have submitted national plans that set clear goals to increase investment in renewable energy, energy efficiency, sustainable infrastructure, climate-smart agriculture, and more. In a context of sustained growth and structural transformation of the economy, Ivorian authorities have undertaken a series of ambitious reforms over the past decade aimed. The national electrification rate as projected by The Government of Cote d'Ivoire is 80% at the end of 2020. According to the Minis-try, the access rate is 79. Thanks to ambitious reforms and strategic discoveries, the country is transforming this sector into a key lever for its economic growth and structural transformation.
