

Discount on bidirectional charging for solar cabinets at resorts

Overview

Get equipped for bidirectional charging with up to \$13,8001 in rebates. To apply, reserve dcbel Ara today. – dcbel, the wave design, and Ara are registered trademarks. This two-way flexibility opens the door to reduced energy bills, grid support incentives, and longer-term savings. For drivers and property owners. A bidirectional EV charger is an advanced EV charging system that enables two-way energy transfer, allowing electric vehicles (EVs) to send power to your home or back into the electricity grid. Unlike standard EV chargers, which use regular AC (alternating current) power for charging, bidirectional. If you're passionate about eco-friendly power generation and looking for a sustainable off grid power system for a resort or island, we can help! Our commercial grade, 100% off-grid, custom designed power system uses a combination of solar, wind and battery storage to reliably power your facility. Get equipped for bidirectional charging with up to \$13,8001 in rebates. The magic happens through power electronics that act as translators between different types of electricity.
