

Does the base station require AC power

Overview

Yes, with a proper 12V DC power supply (3-5 amps minimum) and base antenna system. However, dedicated base stations typically offer better features, ergonomics, and performance for home use. Typical range is 15-25 miles for local communications. So my question is simple: Why don't they make AC-powered radios, especially base stations?

They must know they are going to be used in a household setting 95% of the time, where the only power we have available is A/C, right?

Other than cost, am I correct in speculating that it has to do with line. I just bought a new Bearcat 980 SSB, we will be moving to a semi-remote area hill-top and I want to use it as a SSB/CB base station for emergencies and skipping, instead of as a truck mobile. I've been out of SSB and HAM for a few decades, so we're looking for some Experienced advice on what to. According to rightchannelradios. Required to activate your Ring Alarm Sensors, sold. The power, advanced features and versatility of the typical mobile radio allows it to be easily converted into a base station. It can be placed on a table or desk without a mount or hardware, connected to a proper antenna, powered on, and it's ready to go on the air.
