

# Household solar power generation is suitable

## Overview

Is my home suitable for solar panels?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal. If you are considering solar panels, we'll help you look at the solar energy benefits and drawbacks—complete with expert input, real customer insights and a look at the current conditions of the ever-changing solar energy market. While smaller solar generators are ideal for backup power and camping, high-capacity systems are increasingly capable of supporting essential home. To run a house with a solar generator, you need the right size. The size depends on your power needs and usage. Solar generators are a great way to provide clean energy. But how do you know what size you need?

It's important to consider your. Solar generators operate by capturing sunlight through photovoltaic (PV) solar panels and converting it into electrical energy, which is then stored in a battery. The key. Solar Market Leadership in 2025: Solar energy has reached unprecedented growth, with 248 GW of capacity nationwide powering over 41 million homes and representing 69% of new energy capacity additions in Q1 2025, demonstrating its dominance in the renewable energy transition.
