

How many solar power generators are there

Overview

There are currently 10,550 Solar power plants across the globe with a total capacity of 186242. How much electricity is generated from solar farms each year?

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer. The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data. We will examine several key areas including output, installations, costs, and employment.

Article Content

Solar PV

Global solar photovoltaic capacity has grown from around 40 gigawatts in 2010 to approximately 2.2 terawatts in 2024. Only in that last year, ...

Major Solar Projects List – SEIA

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for ...

Solar, battery storage to lead new U.S. generating capacity additions ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

The U.S. Large-Scale Solar Photovoltaic Database

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Solar Power by Country 2026

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

Solar Power Plants Across the Globe (World Map)

Data and information about power plants and their location across the globe, plotted on an Interactive world map

List of photovoltaic power stations

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....

A global inventory of photovoltaic solar energy generating units

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities — an ...

Global Solar Power Tracker

The tracker further provides national totals for distributed solar capacities for 31 countries/areas. For more information about inclusion criteria, please see our Methodology page.

35 Latest Solar Power Statistics, Charts & Data

In this article, with the help of charts and key statistical data, we reveal the latest solar power statistics that demonstrate how the industry has ...
