

# How many units generate electricity in Benin's dual solar power station

## Overview

The plants will be built in Bohicon, Parakou, Djougou and Natitingou, with two sites generating 15 MWac each and the other two producing 10 MWac. Illouloufin Solar Power Station, is a 50 megawatts (67,000 hp) solar power plant in Benin, whose first 25 MW was commissioned on 19 July 2022, and the next 25 MW is under construction and is expected to come online in 2025. The solar farm is under development by the Government of Benin, with funding. The DEFISSOL plant will help generate and distribute clean and reliable energy for all the people of Benin. It will supply the country with 35 GWh of electricity a year, covering the consumption needs of around 180 000 people and reducing greenhouse gas emissions by 23 000 tonnes of CO<sub>2</sub> a year over. Toyota Tsusho Corporation ("Toyota Tsusho") announced today the conclusion of a contract with the Beninese Electricity Production Company, under the Ministry of Energy and Water, for the construction of a 25 MW solar power plant ("the Project") in the Pobè region of the Republic of Benin ("Benin"). Once operational, the plants are expected to supply electricity to around 50,000 households, helping the country advance its goal of securing 30 percent of.
