

# How much does the Togo energy storage power supply cost

## Overview

The World Bank has committed about CFA 40 billion (\$69.3 million) to the project, which forms part of the Regional Emergency Solar Power Intervention Project (RESPITE). Want to understand what drives the pricing of Togo's outdoor Battery Energy Storage Systems (BESS)?

This guide breaks down cost components, regional market trends, and practical purchasing strategies – perfect for renewable energy professionals and outdoor enthusiasts alike. What Determines Togo O. Togo has begun construction on a 25 MW solar plant with 36 MWh of battery storage in the country's north. This ambitious initiative, backed by a €25 million loan from the French Development Agency (AFD) and the Global Energy Alliance for People and Planet (GEAPP), is set to start in May 2025. In May 2025, the African Development Bank (AfDB) approved a financing package of €26. This investment will finance a 62 megawatt-peak (MWp) photovoltaic plant near the city of Sokodé, marking a major milestone in the country's energy storage. The call for expressions of interest, which closes on 4 June 2024, covers the design, supply and installation of the solar power plant, which will have a capacity of 25 MWp. How big is the investment scale of Togo's energy storage.
