

Install solar charging panels on camper van

Overview

Fitting a solar panel is a job that most people with competent DIY skills can undertake. However, there are a couple of important points to outline before you get your toolbox out. Firstly, the solar panel must be securely attached to the roof. The last thing you want is it flying off halfway down the M5. The second. The solar panel is attached to the roof of the campervan using mounting brackets. These are generally made from plastic. A set of 4 corner plastic. If you cannot use a conventional rigid solar panel because the roof of your campervan is curved, then a flexible solar panel could be the way to go. A. If you do decide to go for a flexible solar panel, then stay away from cheap panels (they are usually cheap for a reason and are more prone to suffer from the problems outlined above). Choose a quality panel, like. Flexible solar panels are usually more expensive to buy and are not as durable as tempered glass panels. Cheaper poor quality panels can be prone to delamination and.
