

Ireland Mobile Energy Storage Site Wind Power Construction

Overview

The 20MW BESS, supplied by global market leader in utility-scale energy storage solutions and services, Fluence, will be co-located with Statkraft's 55. The wind project is currently under construction. Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly. It can store enough power to supply 10,000 homes with renewable electricity for a full four-hour period. We are progressing a pipeline of projects and acquisitions, including initiatives with our trusted partners, to deliver 5GWs of renewable electricity by 2030 target and net zero emissions by 2040. Energy Storage Ireland is a representative association of public and private. Natural Power has successfully supported Statkraft in delivering the Cushaling Wind Farm and co-located battery energy storage system (BESS) in County Offaly, Ireland.
