

Is it profitable to install solar panels to generate electricity

Overview

With electricity rates climbing about 2.8% annually, the financial case for solar panels is strong. Home solar doesn't work for everyone, though. Installing solar panels is a long-term investment that can pay for itself through utility bill savings. The actual solar panel return on investment (ROI) time depends on several factors, including the cost of panels installed and average monthly savings, which can be maximized with leading. Solar Investment Sweet Spot: Homeowners with monthly electricity bills above \$75 and electricity rates exceeding \$0.16/kWh see the strongest returns, with payback periods as short as 4-6 years in high-rate states like California and Hawaii. Solar's value comes from decades of electricity bill savings that add up over your system's 25-30 year lifetime. So how much can someone actually save by switching to solar power?

Staff from the National Renewable Energy Laboratory and GRID Alternatives Colorado install rooftop solar panels.
