

# Is wind power generation considered new infrastructure

## Overview

The IRS recently issued guidance redefining what it means to “begin construction” for purposes of claiming the Clean Electricity Production Credit (Section 45Y) and the Clean Electricity Investment Credit (Section 48E). "Repowering" of wind turbines is turning into a big business for renewable energy companies including GE Vernova, Vestas and Siemens, despite President Trump's vocal opposition and 'no new windmills' pledge, as well as tariffs on steel and aluminum. The nation's onshore wind industry, built out. The IRS issued new guidance for wind and solar energy projects, changing how they qualify for energy tax credits. Projects must now show significant physical work started before July 5, 2026. In the wake of this directive, the federal government has taken actions to encourage the deployment of renewable energy and other. A recent order from the U. To promote wind power across Nebraska, this paper specifically.

## Article Content

Tax Credit Guidance on Wind and Solar Energy ...

Under the familiar 80/20 rule, a facility may be treated as newly placed in service if at least 80% of its value comes from new components.

How does permitting for clean energy infrastructure work?

To meet these targets the United States will have to quickly build a vast amount of clean energy infrastructure, replacing fossil fuel powered ...

Siting and Permitting Wind Projects

With the increased demand for renewable energy, the siting of wind energy facilities is becoming more controversial as more remote project locations become ...

A review of hybrid renewable energy systems: Solar and wind ...

The integration of solar and wind power in HRES holds immense potential to reshape the global energy landscape. This review delves into the challenges, opportunities, and policy ...

Aging U.S. wind energy infrastructure begins its "repowering" era

Onshore wind turbines cover many parts of the U.S. and Trump's attacks on renewable energy won't stop that, but aging wind energy infrastructure does need work.

Propelling Nebraska's Wind Power | Nebraska Law Review | Nebraska

The Board is a state agency that regulates all of Nebraska's 161 public power entities and gives final approval for constructing electric generation facilities, including wind turbines.<sup>18</sup> While the ...

Wind farm

Some critics claim that wind farms have adverse health effects, but most researchers consider these claims to be pseudoscience (see wind turbine ...

Federal Lands and Renewable Energy: What the New ...

The U.S. Department of the Interior's August 2025 order adds new permitting hurdles for wind and solar on federal lands. Learn how capacity ...

Recent Developments in the Federal Multipronged Approach to ...

While the rule change does not explicitly contemplate wind and solar power generation, many issues that the rule addresses relate to independent renewable generators.

Wind Energy | Department of Energy

Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning motion of blades, ...
