

Island New Energy Storage Order

Overview

The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft Implementation Plan that outlines the methods and budget that could be used to achieve the bulk energy storage deployment. The 2024 Energy Storage Order established a statewide goal of deploying 3,000 MW of new bulk energy storage by 2030 and required that NYSERDA submit a draft Implementation Plan that outlines the methods and budget that could be used to achieve the bulk energy storage deployment. New York State is committed to developing a zero-emission electric grid. Over the next five to ten years, large, planned increases in the amount of intermittent renewable generation at both the bulk and distribution level, primarily in the form of on- and off-shore wind and photovoltaic (PV) solar. On June 20, 2024, the New York State Public Service Commission issued an historic Order formally expanding the State's energy storage deployment goal to 6 GW by 2030 and unlocking nearly \$2 billion in incentives for energy storage, the largest investment in the nation to date. The Order approves. New York State is committed to developing a zero-emission electric grid. " In February 2025, the New York Public Service Commission (NYPSC) approved the Residential-Retail Storage Implementation Plan with modifications. Efforts towards a finalized implementation plan have.
