

Kampala energy conservation

Overview

With Kampala being one of the ENACT project cities, this report provides an overview of the energy landscape within Kampala, Uganda's capital city, covering energy consumption patterns, applicable policy frameworks, different energy-related interventions and. With Kampala being one of the ENACT project cities, this report provides an overview of the energy landscape within Kampala, Uganda's capital city, covering energy consumption patterns, applicable policy frameworks, different energy-related interventions and. Women and youth are central to the future of Uganda's agricultural systems. As farmers, entrepreneurs, innovators, and community The Centre focuses on rural electrification, energy for productive use, energy efficiency, energy for household use, energy testing services and energy entrepreneurship. The project contributes towards providing an enabling environment for the provision of safe, reliable, clean and affordable forms of energy (especially clean cooking) access to the urban poor residing African urban informal settlements. This includes the exemplarity of the administration and the development of an inclusive approach that aims at benefiting and engaging local. Now, two decades later, the Centre for Research in Energy and Energy Conservation (CREEC) continues to pioneer sustainable, renewable energy solutions for Uganda and East Africa. We are currently partnered with 25 informal settlements.
