

Latest national policy on solar power generation

Overview

With an ambitious target of generating 40% of the nation's electricity from solar sources by 2035, the law establishes unprecedented tax credits for solar installations, streamlines permitting processes, and allocates \$50 billion for grid modernization projects. There is a patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact your project development. This. Actions to expand generation and consumption of solar and wind energy are seen in three distinct arenas: (1) incentivizing renewable energy production and use, (2) increasing the use of public lands for solar and wind energy projects, and (3) expanding electricity transmission to allow. This toolkit presents a high-level overview of federal and state policies and programs with an impact on solar energy development. As the Trump Administration. Energy policy is becoming more complex, contentious and perhaps fleeting as grid operators look for long-term certainty in their ability to serve increasing load as the electric supply fleet rapidly turns over.

Article Content

New U.S. electric generating capacity expected to reach a record high ...

U.S. power plant developers and operators plan to add 86 gigawatts (GW) of new utility-scale electric generating capacity to the U.S. power grid in 2026 in our latest Preliminary Monthly ...

Recent Developments in the Federal Multipronged Approach to ...

In the wake of this directive, the federal government has taken actions to encourage the deployment of renewable energy and other low-carbon energy sources.

New Solar Energy Law Supercharges PV Production Nationwide

With an ambitious target of generating 40% of the nation's electricity from solar sources by 2035, the law establishes unprecedented tax credits for solar installations, streamlines permitting ...

Spring 2025 Solar Industry Update

In 2024, solar represented 13.7% of net summer capacity and 6.9% of annual generation. EIA projects that PV's growth in 2023 (27 GWac) and 2024 (36 GWac) will continue in ...

The policy, federal actions and judicial decisions shaping solar in 2025

The expansion of energy projects on public lands stands at a critical juncture with new leadership in Washington. The transition will bring heightened scrutiny to existing policies, raising ...

Ending Market Distorting Subsidies for Unreliable, ...

Ending the massive cost of taxpayer handouts to unreliable energy sources is vital to energy dominance, national security, economic growth, and ...

Solar Energy Toolkit: The Federal and State Context Policies ...

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement ...

Solar and Storage Industry Releases Policy Agenda to Strengthen ...

— Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the ...
