

Lead-acid battery warranty replacement

Overview

Responsible for 60,000 roadside recovery call-outs a year, battery failure is a common cause of breakdown in petrol and diesel powered vehicles. There are a number of reasons why a car battery could fail, including. The average lifespan of a car battery is between 3 and 5 years, but this can vary based on a number of factors. These include how often and how long the car is driven, temperature. There are different types of car battery available because different cars have varying power needs. We stock a range of different car batteries so that you can find the right replacement. If you're not sure about your car battery's lifespan, we can test it as part of our free vehicle health check service. With over 250 outlets throughout the UK, you can easily find your nearest. There are a number of signs to look out for when your car's battery needs replacing: If the battery is flat, it will have trouble starting the car's engine; sometimes this is accompanied by.
