Golden, CO: National. The goal of the DOE Energy Storage Program is to develop advanced energy storage technologies, systems and power conversion systems in collaboration with industry, academia, and government institutions that will increase the reliability, performance, and sustainability of electricity generation and. Sandia National Laboratories is a multimission laboratory managed and operated by National Technology & Engineering Solutions of Sandia, LLC, a wholly owned subsidiary of Honeywell International Inc. Department of Energy's National Nuclear Security Administration under contract. The NIST Cybersecurity Framework provides a systematic method: identify, protect, detect, respond, and recover. I recommend microgrid operators align communication layers with this cycle to ensure resilience.
