

Namibia warehouse solar air conditioning

Overview

By harnessing Namibia's abundant sunlight, warehouses can achieve year-round temperature control without relying solely on costly diesel generators or overloaded power grids. Did you know?

A typical 5,000 m² warehouse in Windhoek spends over NAD 400,000 annually on. This is where solar air conditioning steps in as a game-changer. Built to thrive in diverse and demanding environments, our solutions deliver lasting comfort in schools, hospitals, factories, and offices—while promoting energy. With over 300 days of annual sunshine, Namibia has one of Africa's highest solar irradiation levels. Welcome to the Solar Warehouse SA website. Here you will find all the products you need for your load shedding needs! Please contact us by phone, email, our online enquiry form or on our social media pages. Our team will be more than happy. Yet, warehouses across the country face a paradox: scorching temperatures demand energy-intensive cooling systems, while rising electricity costs and grid instability threaten operational. We have a proven track record - we are the leading solar power company in the sunbelt countries where climate conditions are extreme. If ground mounted or installed on roofs, grid-connected or off-grid - we find the best solution for our customers.
