

New Deal for Solar Panels

Overview

The 2022 Inflation Reduction Act (IRA) had promised generous, decade-long tax credits for clean energy (including a 30% credit for home solar installations). However, a mid-2025 budget law – officially the One Big Beautiful Bill Act (OBBBA) – rolled back many of these incentives. Trump administration imposes 126% tariffs on Indian solar imports. The action follows a review by the US Commerce Department, which concluded that Indian manufacturers benefited from state support that allowed them to price their products below US-made alternatives. In. Solar States owner Micah Gold-Markel carries a solar panel from a truck to the house where it will be installed. The installation was like. US solar giant First Solar signed a patent licensing agreement with the UK's Oxford PV, a University of Oxford spin-off, giving it access to issued and pending patents covering perovskite materials, one of the most important next-gen solar technologies.
