

# New Zealand 3 kilowatt solar power generation

## Overview

In New Zealand, each kilowatt of quality solar panels typically produces about 3.5 kWh of electricity per day, depending on region and season. Solar power in New Zealand is a small but rapidly growing contributor to the country's electricity supply. As of the end of September 2025. In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This adds up to about the same capacity of a coal or gas fired Rankine generation unit.

Switchboard Upgrades: Older or non-compliant switchboards may need to be replaced. Scaffolding: Required for homes with multiple stories. Travel Costs: Installations in. Specifically for New Zealand, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.
