

New battery storage system in Australia

Overview

Ausgrid said the new Bankstown community battery energy storage system, its largest yet, will enable households without rooftop PV to reap the benefits of renewable energy, while easing pressure on the grid by absorbing excess solar-generated electricity. The Australia-Asia Power Link BESS is part of SunCable's proposed solar power and transmission project connecting the Northern Territory to Darwin and Singapore. "Operating" includes those projects currently working; "Construction" means those being built or waiting to be commissioned; "Announced" refers to those with a level of commitment - contracts. In early 2025, over AUD 2.5 billion) went into large-scale battery energy storage systems (BESS). This was the second-highest quarterly investment ever, just behind the AUD 2. The Clean Energy Council's Quarterly (Q1 2025) Investment report shows. Australia is home to the world's first 'big' battery: the 100 MW Hornsdale Power Reserve, constructed in 2017. 25 projects are now commercially operational in the NEM. The Iberdrola Group is making progress in its drive for electrification in Australia with two new energy storage milestones in the state of New South Wales. 5 GW in storage capacity and 5 GWh in energy.

How Australia's AUD 2.4B Battery Storage Boom Is ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing ...

Australia's Grid-Forming Battery Revolution: From Pilot Projects to ...

Australia's clean energy transition has reached an important milestone. Five ARENA-funded large-scale battery storage ...

Big Battery Storage Map of Australia

This Big Battery Storage Map of Australia includes all big battery projects of 10MW or 10MWh and above. "Operating" includes those projects ...

Iberdrola boosts electrification in Australia with two new storage ...

The Iberdrola Group is making progress in its drive for electrification in Australia with two new energy storage milestones in the state of New South Wales.

Top 7 Upcoming Battery Energy Storage System ...

Discover the largest upcoming BESS projects in Australia, from the 2.4GW Denman Battery to the Waratah Super Battery.

Australia: The State of Battery Energy Storage in the NEM

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially ...

Big battery investment charges up in Q1 2025

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in Australia, ...

Battery storage systems

We're pioneering Australia's clean energy transition through advanced energy storage solutions that set new standards in power system stability, efficiency ...

Hybrid battery systems: A new frontier for Australia's ...

In this evolving landscape, hybrid battery energy storage systems (BESS) will become critical enablers of Australia's clean energy future.

Ausgrid launches new community battery to support solar

New South Wales electricity distributor Ausgrid has added another centralised community battery to its portfolio, powering up a combined 10 MW energy storage system in the southwest ...
