

New energy storage in Portugal by 2025

Overview

DGEG technicians say the mechanism could unlock "well above 500 MW" of new storage by the end of 2025, pushing the country towards the 2 GW storage target in the PNEC 2030 roadmap. PNEC 2030 establishes clear goals for scaling up renewable energy capacity. By the end of the decade, it aims to install: 20. These two sources alone will contribute more than 33 GW of intermittent renewable capacity, in addition to. When renewables supplied roughly 80% of Portugal's electricity in July 2025, prices in the wholesale market briefly slid below zero—great for generators selling excess electrons, confusing for consumers who still paid standard tariffs. By Paulo Lopes, in Business · 26 Aug 2025, 09:31 · 0 Comments A clear example comes from. A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured nearly EUR 20 million in public funding. Portugal's Ministry of Energy has announced that it has allocated EUR 100 million. Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Photo by Anna Vasileva According to the provisional results, unveiled last week, 43. Tell us and we will take a look. 41 applications approved for funding. Want to know more about this policy ?

Portugal awards grants to 500 MW of energy storage projects

Portugal's Ministry of Energy has announced that it has allocated EUR 100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025. A total of ...

Portugal Battery Storage Boom Lures Foreign Investment

By bundling remuneration for both energy and capacity, officials hope to entice capital that previously hesitated at Portugal's small day-ahead market. ...

ELECTRICITY STORAGE IN PORTUGAL

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portuguese tender supports 500 MW of energy storage ...

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage ...

Portugal allocates funding for 500 MW of energy storage

The Portuguese Ministry of Energy has allocated €99.75 million for grid flexibility and energy storage projects which should be installed by the end of 2025. 41 applications approved for funding.

Portugal to invest \$466 million to boost grid ...

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following ...

Energy Storage Roadmap in Portugal

After analyzing the future challenges that Portugal will face and its decarbonization targets, a necessary growth of up to 50% in storage capacity could be anticipated

GALP announces "solar energy storage projects" in ...

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar ...

Portugal's Renewable Sector Attracts Larger ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the ...
