

New zealand solar energy storage engineering company

Overview

NZ Clean Energy acts as a developer, installer, and long-term operator of utility-scale renewable energy assets, including wind farms, solar photovoltaic (PV) systems, and battery storage facilities. Our integrated approach ensures efficient project delivery and lasting impact. With scalable solar energy storage systems that cut costs, boost resilience, and gives farms and businesses full control over your energy use. We are developers, designers, engineers, installers. 100% Kiwi owned, Taspac was founded in 2014 with a very simple goal - to provide best-in-class renewable energy solutions to New Zealand solar installers and electricians, backed up with a high level of local sales. Renewable Engineering is an Auckland based engineering firm specialising in large scale solar and grid scale Engineering. Whether you want to slash your business power costs, maximise the return on your commercial property or live independent of the power company with. McKay's work in the renewables sector is deeply rooted in our design, engineering, and construction capabilities of renewable energy development, providing innovative solutions that align with New Zealand's vision for a sustainable future. Our expertise extends to a range of renewable energy.
