

Nigeria purchases mobile energy storage power

Overview

A Nigerian energy company is to be the recipient of the largest US government-financed battery storage system exported to Africa. Sapele Power Plc, which specialises in power generation, is to receive a 1MW/8 MWh of long-duration energy storage from US-based ESS Tech, Inc. Solar photovoltaics combined with battery storage could meet 66% of Lagos's projected 2050 energy demand without significant infrastructure upgrades. Tinubu added that the system will provide electricity to 2 million Nigerians. Since 2021, the company has made significant strides delivering clean energy solutions to underserved communities in sub-Saharan Africa, particularly in Nigeria. At EM-ONE, we've spent over a decade specializing in designing, developing and building. Nigeria's energy transition in 2025 is no longer being defined by incremental megawatts added to the national grid.
