

Off-grid solar-powered containerized power supply for tourist attractions

Overview

A mobile solar container is essentially a containerized portable solar power system that can be transported to remote or off-grid areas. If you're passionate about eco-friendly power generation and looking for a sustainable off grid power system for a resort or island, we can help! Our commercial grade, 100% off-grid, custom designed power system uses a combination of solar, wind and battery storage to reliably power your facility. The answer could revolutionize how island-based eco-tourism is conducted. Whether you are running a luxury bungalow, a backpacker lodge, or an entire resort village, a mobile solar container gives clean, silent, and remarkably low-maintenance power—minus the logistical inconvenience of fuel. A mobile solar container is a self-contained, transportable solar power unit built inside a standard shipping container.
