

## Off-grid systems liberia

|                                           |
|-------------------------------------------|
| <i>LiFePO<sub>4</sub> Battery, safety</i> |
| <i>Wide temperature: -20~55°C</i>         |
| <i>Modular design, easy to expand</i>     |
| <i>The heating function is optional</i>   |
| <i>Intelligent BMS</i>                    |
| <i>Cycle Life: ≥ 6000</i>                 |
| <i>Warranty: 10 years</i>                 |

### Overview

Hundreds of homes as well as clinics and schools in northern rural Liberia are set to be powered by solar mini-grids – part of a wider electrification drive aimed at bringing a stable electricity supply to thousands more. The first newly constructed mini-grids co-funded by the Beyond the Grid Fund for Africa (BGFA) are delivering electricity in northern rural Liberia. This week marked. The financed project will help to improve the affordability of off-grid energy products in Liberia and in the long term support higher standards of education, increase gender equality and create new employment opportunities in the country through productive use of electricity. For much of the world, access to affordable and dependable electricity underpins healthcare. Advanced lithium battery systems designed to provide uninterrupted power for homes, offices, and institutions.
