

Parallel solar container lithium battery packs to increase capacity

Overview

Summary: Connecting lithium battery packs in parallel can boost energy storage capacity and system flexibility. However, improper configurations may lead to safety risks. This guide explains the process, safety considerations, and real-world applications – perfect for solar installers, EV enthusiasts, and industrial energy. Yes, you can mix different capacity lithium batteries, whether a normal 12V 100Ah battery or a Lithium server rack battery. Understanding Battery Types: Familiarize yourself with different solar battery types such as lead-acid, lithium-ion, and. So - my question for you, based on your experience, should it be OK to mix 1 bank of CATLs and 1 bank of EVEs of almost the same capacity?

My inverter is an Deye 12K 3P, so charge and discharge is on low rates even on my current setup. Each pack should be able to handle at least 3/4 your total load current.
