

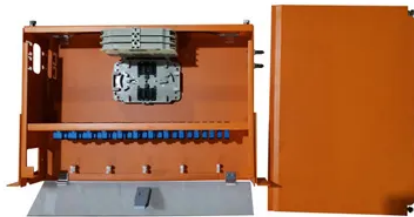

Photovoltaic Onsite Energy Recommendations Outdoor Solar

Overview

This fact sheet explores how to maximize the advantages of onsite renewable energy generation, specifically focusing on solar photovoltaic (PV) systems. The sections in this guide discuss how local governments can work with utilities, local. Onsite solar is an asset installed in the same location where the energy generated will be consumed. For each kilowatt-hour (kWh) the onsite solar asset produces, a kWh of consumption will be offset for a buyer of renewable energy, or offtaker. When does the Energy Code apply?

Section 140. 10 (a) -PDF of the 2025 Energy Code requires solar photovoltaic (PV) systems for all newly constructed nonresidential buildings, with five. Installing on-site renewable energy systems is a common strategy facility owners can use to save money, reduce their greenhouse gas emissions, and add resiliency to their facilities by generating their own electricity.
