

Photovoltaic energy storage trends in the second half of the year

Overview

The report includes comprehensive analysis of deployment trends, market sizing, and growth projections for utility scale and behind the meter segments, in addition to an energy storage supply chain analysis, federal and state policy overview, and technology roadmaps and. The report includes comprehensive analysis of deployment trends, market sizing, and growth projections for utility scale and behind the meter segments, in addition to an energy storage supply chain analysis, federal and state policy overview, and technology roadmaps and. A new quarterly report from SEIA and Benchmark Mineral Intelligence highlights a 30% year-over-year growth in the U. battery market, even as the industry braces for supply chain restructuring and a shift in the political landscape. Image: Wikimedia Commons / Qurren The U. energy storage. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This amount represents an almost 30% increase from 2024 when 48.9 GW of rooftop solar, up 72% year on year. This is one of the main takeaways from the 'Sustainable Energy in America 2025 Factbook', the latest. After a strong 2024 that drove residential solar and storage prices to all-time lows, the first six months of 2025 have brought both momentum and uncertainty to the solar industry.

EnergySage Releases 21st Solar & Storage Marketplace Report, ...

For a decade, the Solar & Storage Marketplace Report has provided an unparalleled look into the trends for pricing, equipment, and consumer preferences shaping today's U.S. residential ...

Winter 2025 Solar Industry Update

In addition to price differences based on system size, there is variation in the price of stand-alone (no energy storage) distributed PV systems between states and within individual markets.

US deployed 11.9GW of storage in 2024, 18.2GW ...

Regarding the growth of energy storage in the US, the EIA highlighted its importance when paired with other renewables in order to provide ...

Energy Storage Market Outlook – SEIA

The report includes comprehensive analysis of deployment trends, market sizing, and growth projections for utility scale and behind the meter segments, in addition to an energy storage ...

U.S. energy storage shatters records with 58 GWh installed in 2025

The U.S. energy storage industry has entered a “new phase of sustained, high-volume deployment,” according to the inaugural Energy Storage Market Outlook Q1 2026 released by the ...

US Energy Storage Monitor | Wood Mackenzie

The US Energy Storage Monitor is offered quarterly in two versions– the executive summary and the full report. The executive summary is free, and provides a ...

pv magazine International – News from the photovoltaic and storage ...

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Solar, battery storage to lead new U.S. generating capacity additions ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

Quarterly Solar Industry Update

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the ...

EnergySage Releases 21st Solar & Storage ...

After a strong 2024 that drove residential solar and storage prices to all-time lows, the first six months of 2025 have brought both momentum and ...
