Photovoltaic panels cheat money

Overview

This article will highlight the red flags of fraudulent solar programs and teach you how to protect your personal information, compare offers from different companies, and ensure you're only working with a reputable company before moving forward with solar energy improvements. The solar industry's explosive growth has created real opportunities for homeowners to save money and reduce their carbon footprint. If you've received an offer for "free solar panels," it could be a scam. The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy. Here's our guide to spotting solar panel scams and finding a great installer. If something you see or hear from a salesperson sounds too good to be true, it probably is.
