Regrets about photovoltaic panels

Overview

Solar panels are supposed to SAVE money—but what if they cost you everything instead?

In this eye-opening video, we dive deep into the dark side of solar panel deals. Honest homeowner shares his biggest regrets after installing rooftop solar six years ago: 'If I were to do this again today. ' "Exactly what one needs to hear before embarking on. We signed the contact for a 12. 5kw system with 30 panels for $62904 the same day. We were approved for a 25 year loan at 2. The salesman stated that the 30% tax credit was refundable (WRONG!). From choosing poor-quality panels, underestimating maintenance costs, ignoring local utility rules to not understanding tax. That's the average price of a US household going solar, and that's after you manage to wring out all of the available tax credits or rebates, local and federal. It's the equivalent of 150-180 average monthly electricity bills. 49% and the principal balance is still ~$55,000. I have 24 panels on an 1100 sq ft, ranch style home in northern/central AZ - a pretty sizable amount for a small home; it takes up most surface area on the roof. By sharing his experiences and.
