

# Solar energy storage has great business opportunities

## Overview

But here's the kicker - the best energy storage business opportunities aren't just for tech giants. From neighborhood solar banks to industrial-scale thermal storage, there's room for innovators at every scale. Let's see how solar is projected to grow and how you can grab yourself a piece of the solar pie. Renewable energy has been an important sector for many years. With the global market projected to hit \$673.2 billion by 2030 (that's an 11.8% annual growth rate!), this sector's hotter than a Tesla battery on a summer road trip. Beyond resiliency, energy storage enables businesses to maximize the value of a PV system while potentially reducing significant utility demand charges (see [HERE](#) for an introduction to demand charges). CATL has a range of energy storage solutions including those for solar-plus-storage - Credit: CATL Solar photovoltaic (PV) and wind have constituted the majority of new global power capacity for several years according to the United Nations 2025 Energy Transition Report. Last year, the company's profit fell 45% compared with 2024, driven in large part by falling sales of its electric vehicles.
