Overview

Find your curtain wall with photovoltaic panel easily amongst the 4 products from the leading brands (PROFILS SYSTEMES, ETEM, 2ES.) on ArchiExpo, the architecture and design specialist for your professional purchases. Photovoltaic curtain walls are well suited to projects where large glazed areas are integral to the architectural concept and where on-site generation can be incorporated without adding external structures. Typical applications include: They are also a strong option for major envelope. The integration of photovoltaic modules in buildings can be carried out in very different ways and gives rise to a wide range of solutions. The facades provide a first view of the building to the visitor. The layering of tempered glass, PVB, and CdTe photovoltaic module ensures strength, safety, and long-lasting durability. During CES 2026, BiLight introduced what it calls the world's first solar curtain – a fabric made with flexible perovskite photovoltaic material that can generate electricity while hanging as a typical window fabric.
