

Solar power generation upstream and downstream industry chain

12V 10AH

Overview

The solar industry has evolved into one of the most important manufacturing ecosystems globally, but understanding its structure requires looking at the value chain from end to end. The sector is broadly divided into three core segments: upstream, midstream, and downstream. The first part includes manufacturing. NLR conducts analysis of solar industry supply chains, including domestic content, and provides quarterly updates on important developments in the industry. These analyses draw from data collected through a combination of third-party market reports, primary interviews, and publicly available data. Solar photovoltaics (PV) remains one of the fastest-growing segments in the global energy transition, continuing to break deployment records even as markets evolve and competitive dynamics shift. In 2025, global new solar capacity additions are on track to surpass previous annual high rates —. The U. Masayoshi Son, Chairman & CEO of SoftBank.

Article Content

Evolution and vulnerability analysis of global photovoltaic industry ...

As global energy demand increases, photovoltaic power generation has become the solution to the energy conundrum. Based on global photovoltaic product trade data from 2000 to 2023, this paper ...

Understanding the Solar Industry: Value Chain, ...

The sector is broadly divided into three core segments: upstream, midstream, and downstream. Each plays a distinct role in how solar power is ...

Power Markets: Upstream and Downstream Systems

In this article, we will explore the U.S. power markets comprehensively, discussing upstream generation facilities, midstream ...

Global solar photovoltaic industry network dynamics 2007–2023. Inter ...

Based on a sample of globally leading solar PV manufacturers originated in Canada, China, Germany, South Korea, and the United States of America we conduct a detailed analysis and ...

Progress in Diversifying the Global Solar PV Supply Chain

Based on up-to-date data and information, this report explores the progress in diversifying the global solar PV supply chain through four sections. Section 1 provides an overview of the global solar PV ...

Executive summary – Solar PV Global Supply Chains

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

Solar Landing Page

How we help Apricum's solar PV team operates across the full value chain, advising upstream and downstream clients. With multi-decade industry experience and outstanding track record, we provide ...

Evolution and vulnerability analysis of global ...

As a result, this study uses the solar industry chain as its starting point, identifies important network nodes and models how the network's ...

Solar Supply Chain and Industry Analysis | Solar Market Research ...

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material ...

A brief overview of the upstream and downstream ...

Unicorn Solar provides a brief overview of the upstream and downstream sectors of the PV industry, intending to highlight what happened in ...
