

Solomon Islands New Energy solar Site

Overview

The Solomon Islands Renewable Energy Development Project plans to finance new solar farms in Guadalcanal and Malaita provinces, along with a utility-scale grid-connected energy storage system in Honiara, the country's capital. It will also support a pilot for rooftop solar at two. The Solomon Islands is taking a significant step towards a sustainable energy future by enhancing its solar power capacity. This ambitious initiative, backed by crucial support from the Asian Development Bank (ADB) and the Saudi Fund for Development, is set to reduce the nation's reliance on fossil fuel generation (over 97%); and (ii) contribute to sector reforms for better governance and public-private partnership (PPP) enabling environment. More than 1,200 people in the remote community of Takataka, East Are'are, are now benefitting from clean, reliable solar power through an Australia-supported partnership that is bringing off-grid renewable energy to one of the Solomon Islands' most isolated regions. The project will reduce the need for costly shipments of diesel to the provincial centers. The solar “hub” at Takataka Cultural Centre in Solomon Islands' Malaita province is now installed and energised, a major milestone for the Off-Grid Renewable Energy Partnership between Superfly Limited, Mai-Ma'asina Green Belt (MMGB), Save the Children Solomon Islands and the Australian Government.

Renewables project to boost solar on Solomon Islands

The Solomon Islands Renewable Energy Development Project plans to finance new solar farms in Guadalcanal and Malaita provinces, along ...

New solar hub powers clean energy and opportunity in ...

More than 1,200 people in the remote community of Takataka, East Are'are, are now benefitting from clean, reliable solar power through an Australia ...

Makira's New Solar Farm to Start Soon

The project's goal is to boost renewable energy generation at Solomon Power's outstations in Kirakira, Lata, Malu'u, Munda, and Tulagi. It ...

Solomon Islands: Solar Power Development Project

The Asian Development Bank is working with the Government of Solomon Islands and Solomon Power to convert electricity networks in five provinces almost entirely to solar power.

Solomon Islands solar power: Unique 20MW Project ...

The project focuses on constructing new solar plants, integrating advanced battery storage systems, and upgrading existing distribution networks ...

Solar partnership energising Solomon Islands' remote East Are'are ...

The solar “hub” at Takataka Cultural Centre in Solomon Islands' Malaita province is now installed and energised, a major milestone for the Off-Grid Renewable Energy Partnership between ...

Masdar | Solomon Islands - Solar PV Plant in Honiara

Approximately 90% of the electricity produced is diesel generated. The one megawatt solar PV plant, which was expanded from 600kW following a grant ...

Solomon Islands Photovoltaic (PV) Project

The Solomon Islands Renewable Energy Development Project plans to finance new photovoltaic (PV) parks in the provinces of Guadalcanal ...

Superfly Limited solomon islands

We design our solar systems for Solomon Island's hot temperatures and remote, rural conditions. We only use lithium batteries; and we stick to quality ...

Solomon Islands : Renewable Energy Development Project

Several renewable energy projects are under development by Solomon Power, including new small solar-diesel hybrid grids and modernization of hydropower plants. Project Data Sheets ...
