

Some potential customers of energy storage power supply

Overview

When we talk about energy storage's VIP clients, national grid companies and state-owned energy giants take center stage. These are the folks keeping your lights on during blackouts and making renewable energy actually usable. Starting from system. The American Public Power Association is the voice of not-for-profit, community-owned utilities that power approximately 2,000 towns and cities nationwide. Take China's State Grid Corporation – they've been snapping up storage. The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030. Continued. What role do customer-sited battery energy storage systems (BESS) have in enhancing grid reliability and resilience while facilitating decarbonization?

Deployments of residential customer-sited BESS in the United States jumped in 2021 by 69% over 2020 installations, as energy users sought greater.
