You can find typical dimensions of 100W, 150W, 170W, 200W, 200W, 220W, 300W, 350W, 400W, and 500W solar panels summarized in the chart below. But, just to emphasize the problem, let's have a look at how the standard solar panel sizes are usually explained. They are not expressed as dimensions for. Our range of solar panels are constructed from ultra-efficient polycrystalline and have been designed to provide a reliable and cost-effective alternative energy solution for applications where mains power is either not available, or not desirable. A 400W panel has the same physical footprint whether it produces 350W or 450W - the difference lies in cell efficiency and technology. 5 feet wide and weigh between 40 to 50 pounds.
